Suven Life Sciences secures 7 (seven) Product Patents for their NCE's in ARIPO, Europe, Hong Kong, Japan, Macau and South Korea

HYDERABAD, INDIA (Dec 23, 2015) - Suven Life Sciences Ltd (Suven) announced today that they secured product patents in ARIPO (AP 3340), Europe (2611444), Hong Kong (HK 1187613), Japan (5805795) Macau (J/001756 & J/001848) and South Korea (10-1554407) to their New Chemical Entities (NCE's) for CNS therapy through mechanism of action – H₃ Inverse agonist and these patents are valid until 2031. The granted claims of the patent include the class of selective H₃ ligands discovered by Suven and are being developed as therapeutic agents and are useful in the treatment of cognitive impairment associated with neurodegenerative disorders.

With these new patents, Suven has a total of **one (1)** granted product patent in **ARIPO**, **nineteen (19)** granted patents from **Europe**, **Eighteen (18)** granted patents from **Hong Kong**, **eighteen (18)** granted patents from **Japan**, **seven (7)** granted patents from **Macau** and **eighteen (18)** granted patents from **South Korea**. These granted patents are exclusive intellectual property of Suven and are achieved through the internal discovery research efforts. Products out of these inventions may be out-licensed at various phases of clinical development like at Phase-I or Phase-II

“We are very pleased by the grant of these patents to Suven for our pipeline of molecules in CNS arena that are being developed for cognitive disorders with high unmet medical need with huge market potential globally” says Venkat Jasti, CEO of Suven.

“Suven Life Science is a biopharmaceutical company focused on discovering, developing and commercializing novel pharmaceutical products, which are first in class or best in class CNS therapies through the use of GPCR targets. Suven has 3 clinical stage compounds, a Phase 2 undergoing candidate SUVN-502, Phase 1 completed candidate SUVN-G3031 and Phase 1 undergoing candidate SUVN-D4010 for Alzheimer's disease and Schizophrenia. In addition to that the Company has ten (10) internally-discovered therapeutic drug candidates currently in pre-clinical stage of development targeting conditions such as ADHD, dementia, depression, Huntington's disease, Parkinson's disease and pain.
