Suven Life Sciences secures two (2) Product Patents in Australia and Canada

HYDERABAD, INDIA (Feb 19, 2016) - Suven Life Sciences Ltd (Suven) announces today that the grant of **one (1) product patent from Australia (2012311057) and one (1) product patent from Canada (2827567)** corresponding to the New Chemical Entities (NCEs) for the treatment of disorders associated with Neurodegenerative diseases and these Patents are valid through 2032 and 2031 respectively.

The granted claims of the patent from **Australia** include the **class of selective 5-HT₄ compounds and the granted claims of the patent from Canada** is through **mechanism of action – H₃ Inverse agonist** and are being developed as therapeutic agents and are useful in the treatment of cognitive impairment associated with neurodegenerative disorders like Alzheimer's disease, Attention deficient hyperactivity disorder (ADHD), Huntington's disease, Parkinson and Schizophrenia.

With these new patents, Suven has a total of **twenty three (23) granted patents from Australia and twenty two (22) granted product patents from Canada**. These granted patents are exclusive intellectual property of Suven and are achieved through the **internal discovery research** efforts. Products out of these inventions may be out-licensed at various phases of clinical development like at Phase-I or Phase-II.

"We are very pleased by the grant of these patents to Suven for our pipeline of molecules in CNS arena that are being developed for cognitive disorders with high unmet medical need with huge market potential globally" says Venkat Jasti, CEO of Suven.

Suven Life Science is a biopharmaceutical company focused on discovering, developing and commercializing novel pharmaceutical products, which are first in class or best in class CNS therapies through the use of GPCR targets. **Suven has 3 clinical stage compounds, a Phase 2 undergoing candidate SUVN-502, Phase 1 completed candidate SUVN-G3031 and Phase 1 undergoing candidate SUVN-D4010 for Alzheimer's disease and Schizophrenia. In addition to that the Company has ten (10) internally-discovered therapeutic drug candidates currently** in pre-clinical stage of development targeting conditions such as ADHD, dementia, depression, Huntington's disease, Parkinson's disease and pain.
