Suven to Present at Alzheimer's Association International Conference (AAIC)

HYDERABAD, INDIA (July 11, 2014) – Several exciting new results and data presentations from Suven's portfolio of investigational neuroscience new chemical entities (NCEs) are being presented at **Alzheimer's Association International Conference (AAIC)** being held in Copenhagen, Denmark during July 12-17, 2014

AAIC is the world's largest conference of its kind, where thousands of researchers from more than 60 countries will gather to reveal the latest study results, theories and discoveries bringing the world closer to breakthroughs in dementia science.

Alzheimer's disease is one of the scourges of modern day health care which is the largest and fastest growing unmet medical need and Suven is in the forefront of developing a drug for the treatment of this debilitating disease. Alzheimer's is a dementia that causes problems with memory, thinking and behavior. **Alzheimer's is not just a memory loss as everyone thinks but Alzheimer's kills.**

Suven has excellent portfolio of new molecules through four mechanisms of action using 5-HT6, 5-HT4, H3 and Neuronal Nicotinic acetylcholine receptors for the symptomatic treatment of cognitive impairment in Alzheimer's disease but also possibly useful in reducing the disease progression. Suven scientists are presenting pre-clinical and clinical data on these molecule and other NCEs on cognitive impairment and memory related disorders.

Suven Life Science is a biopharmaceutical company focused on discovering, developing and commercializing novel pharmaceutical products, which are first in class or best in class therapies through the use of GPCR targets. **The Company has twelve (12) internally-discovered therapeutic drug candidates currently** in pre-clinical stage of development targeting conditions such as ADHD, dementia, depression, Huntington's disease and Parkinson's disease in addition to **clinical candidate SUVN-502** for Alzheimer's disease and Schizophrenia.
