Suven Life secures One (1) Product Patent in South Korea and one (1) from USA

HYDERABAD, INDIA (OCT 13, 2014) – Suven Life Sciences Ltd (Suven) announces today that its drug discovery portfolio which has expanded into several new therapeutic areas such as Major Depressive Disorder (MDD), Obesity and Pain through Neuronal Nicotinic Receptor modulators resulted in the grant of one **(1) product patent from USA (8735423) and one (1) product patent from South Korea (10-1410903)** corresponding to the New Chemical Entity (NCE) for the treatment of disorders associated with Neurodegenerative diseases and these Patents are valid through 2030

The granted claims of the patents include the class of **selective alpha-4-beta-2 compounds discovered by Suven** and are being developed as therapeutic agents for major depressive disorder (MDD).

With these new patents, Suven has a total of **nineteen (19) granted patents from USA and fifteen (15) granted patents from South Korea**. These granted patents are exclusive intellectual property of Suven and are achieved through the internal discovery research efforts. Products out of these inventions may be out-licensed at various phases of clinical development like at Phase-I or Phase-II.

"We are very pleased by the grant of these patents to Suven for our pipeline of molecules in CNS arena that are being developed for Major Depressive Disorder (MDD) with high unmet medical need with huge market potential globally" says Venkat Jasti, CEO of Suven.

Suven Life Science is a biopharmaceutical company focused on discovering, developing and commercializing novel pharmaceutical products, which are first in class or best in class CNS therapies through the use of GPCR targets. **The Company has twelve (12) internally-discovered therapeutic drug candidates currently** in pre-clinical stage of development targeting conditions such as ADHD, dementia, depression, Huntington's disease, Parkinson's disease and obesity in addition to **developmental candidate SUVN-502 for Alzheimer's disease and Schizophrenia**.
