

News Release

Suven Life sciences presenting at Neuroscience 2018 at San Diego, USA.

HYDERABAD, INDIA (Nov 5, 2018) – Suven Life Sciences Ltd (Suven) is participating and presenting positive Pre-clinical and Phase-1 clinical data of several advanced molecules from their portfolio of new chemical entities (NCEs) and the status of Phase 2 clinical trial of their lead compound SUVN-502 at Neuroscience 2018, organized by Society for Neuroscience being held at San Diego, USA during 4 to 7 November 2018. Neuroscience is the annual meeting of the Society for Neuroscience (SFN) and more than 30 thousand Neuro-Scientists from all over the world covering the major Pharma, Biotech and Clinical Research institutes will be participating at this conference

Key pharmacology, ADME, Safety and Phase-2 clinical trial status of SUVN-502 (5-HT₆ receptor antagonist), Phase 1 clinical data of SUVN-G3031 (Histamine-3 receptor antagonist) and SUVN-D4010 (5-HT₄ receptor partial agonist) along with CB2 agonist and Muscarinic (M1) acetylcholine receptor positive allosteric modulators (PAM) to treat the unmet medical needs of patients living with cognitive dysfunction associated with Alzheimer's, Schizophrenia, ADHD; Depression & Mood Disorders, Neuropathic Pain and Sleep Disorders are being presented by Suven scientists at SFN-2018. These data presentations highlight Suven's continued commitment to explore new treatment options addressing unmet medical need through novel mechanisms and targets.

About Suven Life Sciences

Suven Life Science is a biopharmaceutical company focused on discovering, developing and commercializing novel pharmaceutical products, which are first in class or best in class CNS therapies using GPCR targets. Suven has 4 clinical stage compounds, a Phase 2 undergoing SUVN-502, Phase 2 ready SUVN-G3031 and Phase 1 completed SUVN-D4010 and SUVN-911.

In addition to these clinical compounds the Company has nine (9) internally-discovered therapeutic drug candidates currently in various stages of pre-clinical development targeting conditions such as ADHD, dementia, depression, Huntington's disease, Parkinson's disease and pain.
